The right textile machines – Success factors of German technology

High efficiency, flexibility and quality

- Substantial savings in energy and raw materials for sustainable production
- Adaptation of machines and components to the special product requirements (not only standard machines)
- Best manufacturing quality for top-shelf products

Technology plus consulting skills

- Highly qualified engineers and experienced technologists
- Considerable investments in R&D
- Reliable world-wide service

Operator-friendly machine technology

- Focus on efficiency in operation, ergonomic design and safety
- User-friendly control equipment

Leadership in technical textiles

- Cooperation with 16 textile research institutes and about 1,100 textile researchers in Germany
- Cooperation with technical textile manufacturers worldwide

A worthwhile investment

- Low maintenance costs and reliability in production – the price for a German machine pays off

Your quickest way to find textile machines

www.machines-for-textiles.com is your fast and simple way to search for products and manufacturers:

The sourcing service assists you by a broad range of searching possibilities:

- Free text search: input of machine names (or parts of it), textile products and also of a company name
- Hierarchical search for categories of textile machinery and accessories
- Hierarchical search of textile products for which production technology is requested.

The results shown are the competent VDMA member companies with all contact data.

Other features:

- Innovation: application reports and success stories
- Fairs and symposia: where you can meet the VDMA members
- Media: releases from member companies and VDMA

Take a look!

Technologies for the entire textile chain

The roundabout 130 member companies of VDMA Textile Machinery cover the full range of production technique for the textile industry:

- Machinery for spinning preparation, man-made fibre production, spinning, auxiliary machinery and accessories
- Machinery for winding, texturing, twisting; auxiliary machinery and accessories
- Machinery for web formation, bonding and finishing of nonwovens and felting; auxiliary machinery and accessories
- Weaving preparatory machinery, weaving, tufting machinery; auxiliary machinery and accessories
- Knitting and hosiery machinery; auxiliary machinery and accessories
- Braiding and embroidery machinery; accessories
- Washing, bleaching, dyeing, printing, drying, finishing, cutting, rolling and folding machinery, auxiliary machinery and accessories
- Laboratory testing and measuring equipment; accessories
- Transport, handling, storing and packing equipment; accessories
- Equipment for recycling, waste reduction and pollution prevention; accessories
- Software for design, data monitoring, processing and integrated production
- Equipment and products to ensure machinery and plant operations

You can find these product categories and additional search options at www.machines-for-textiles.com
